

# On-site training. (This is what you get from us)

With our expanding national economy and increasingly competitive market forces, it is not surprising that many firms need to spend large amounts of money on modern technology, plant and machinery in order to maximize efficiency. What is surprising though is the comparative lack of time spent on proper training for the operation of such machinery especially lift trucks.

Insufficient knowledge and skill can result in misuse and unsafe handling. This often leads to accidents causing damage, and personal injury. And of course liability for you the employer. Accidents involving lift trucks are alarmingly common, although many could be prevented if operators are adequately trained and competent in handling techniques. It is difficult to keep up with the requirements of the

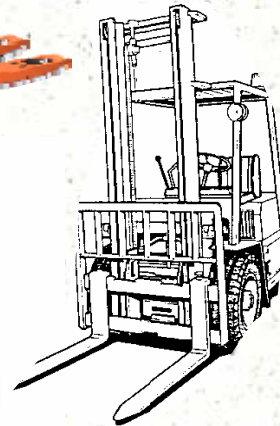

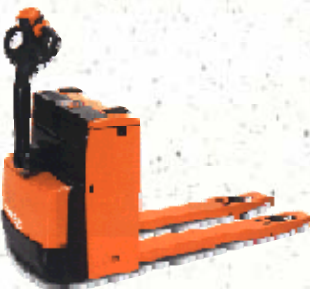

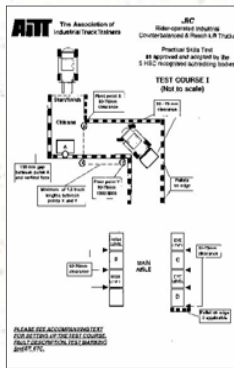

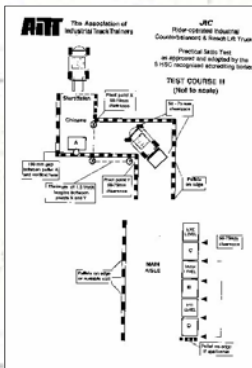

1974 Health & Safety Act.

Correct application of the act regarding training of lift truck operators is an important part of an employer's responsibility. Increased with the new Approved Code of Practice 1999. In relation to this Thomas Truck Training Ltd issues full accredited licenses and reports. There is also a new standard of tests(2001) for all operators. And yes we use that....

(FOR FURTHER INFORMATION SEE OUR WEB PAGES)

## What you must have for us

- The appropriate lift truck
- A minimum of 12 pallets
- 2 palliated loads
- A quiet area to train in
- A quiet room available with a power supply.
- We supply all training manuals and videos etc.

## The advantages

- 3 Operators can be trained at one time, if required.
- Operators remain on site.
- Short term notice to arrange course.
- Training just as a large dedicated training center.
- Trucks that your operators are familiar with.
- Report on Lift Truck operation on your site.
- All operational support paper work

## Our added value package.

### The courses are generally

- 2/3 or 5 days depending on experience
- 1 full day refreshers are also offered.

We will follow your trainees shift pattern so if it is 6-2 or 2-10 or nights or even weekends we will fit in. ( At no extra cost).

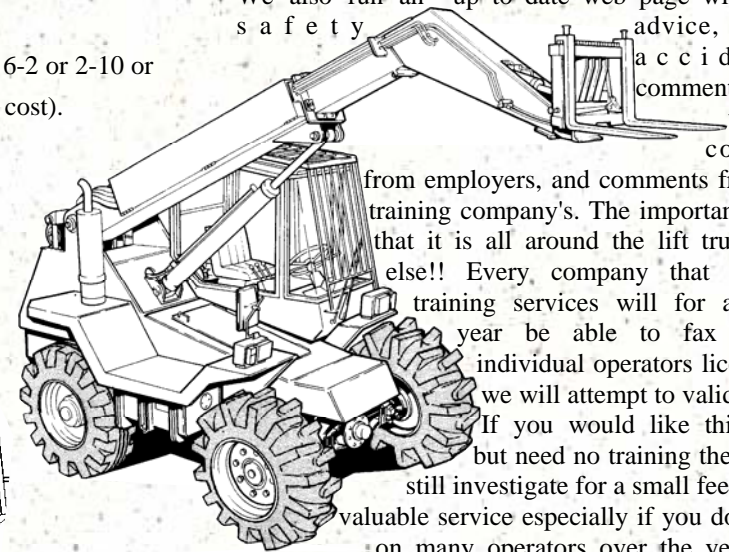

## Added Value to your firm

**TTT Ltd** wants to make the difference.

Every course comes with an operators colour manual. This manual could include **your** working practices and operating procedures printed on the back pages. The fact is each course needs are addressed individually after instruction from you. Making operators aware of your specific work practices means you can be confident they can't say "I didn't know". We can even print your company logo and operators names on the manual.( No extra charge) Every new company to us, a report is put together on how we see the operation of the lift trucks at that location. The report is only a guide line but may provide relevant working practices with regard to Health & Safety around the lift truck operation.

We also run an up to date web page with letters, safety advice, recent accidents, comments from trainees, comments from employers, and comments from other training company's. The important thing is that it is all around the lift truck. What else!! Every company that uses our training services will for approx. 1 year be able to fax us with individual operators licenses and we will attempt to validate them. If you would like this service but need no training then we will still investigate for a small fee. This is a valuable service especially if you do not take on many operators over the years. How else do you know it is genuine??

Please start to use our added value by looking at our Health & Safety pages now.
